Washington, D.C. 20231

PETITION UNDER RULE 1.47(a)

Dear Sir:

This Petition is made pursuant to Rule 1.47(a) to permit co-inventor Victor Firoiu to make this application for patent on behalf himself and co-inventor Marty Borden, who cannot be reached after diligent effort. Mr. Borden's last known address is 30 Shaker Lane, Littleton, MA 01460.

Enclosed herewith is:

(a) Combined Declaration and Power of Attorney executed by co-inventor Victor Firoiu, for himself and on behalf of Marty Borden;

DECLARATION OF JEFFREY KLAYMAN
IN SUPPORT OF PETITION UNDER RULE 1.47(a)

I, Jeffrey Klayman, hereby declare that:

1. I am a registered patent attorney, and am currently responsible for the continued prosecution of the subject U.S. patent application (hereinafter "the application").

2. To the best of my knowledge, the inventor, Marty Borden, no longer works for Nortel Networks Limited (assignee of the application), and has not informed either Nortel Networks Limited or co-inventor Victor Firoiu of his new employer.

3. According to my records, a "Combined Declaration and Power of Attorney" (hereinafter "declaration") was mailed to Mr. Borden on June 15, 2000 at his last known home address of 30 Shaker Lane, Littleton, MA 01460, pursuant to instructions from Nortel Networks Limited to send correspondence to the inventor's home address. This letter was sent by another patent attorney who has been involved in the preparation and prosecution of the application, John Stickevers (please see the attached Declaration of John Stickevers). A copy of this letter is attached.

4. According to my records, a follow-up letter was mailed to Mr. Borden on June 20, 2000 at his above-mentioned home address. This follow-up letter was sent by another patent attorney who has been involved in the prosecution of the application, Steven Saunders (please see the attached Declaration of Steven Saunders). This follow-up letter included a copy of the application as filed, and indicated that the declaration had been sent to Mr. Borden on June 15, 2000. A copy of this follow-up letter is attached.

5. As of September 12, 2000, Mr. Borden had not returned the executed declaration.

6. According to my records, a reminder letter including an executable copy of the declaration was mailed to Mr. Borden on September 12, 2000 at his above-mentioned home address. A copy of this reminder letter is attached.

7. As of September 22, 2000, Mr. Borden had still not returned the executed declaration.

8. On September 22, 2000, I obtained an electronic mail address for Mr. Borden from Mr. Firoiu, and sent an electronic mail message to Mr. Borden requesting that he contact me regarding, among other things, executing the declaration for the subject application. A copy of the electronic mail message is attached.

9. By October 4, 2000, Mr. Borden had still not returned the executed declaration. Nor had Mr. Borden contacted me in response to my electronic mail message.

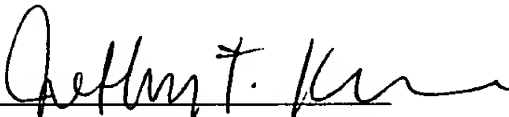

10. On October 4, 2000, I obtained a home phone number for Mr. Borden and left a voice mail message on his answering machine requesting that he contact me regarding, among other things, executing the declaration for the subject application.

11. By October 6, 2000, Mr. Borden had still not returned the executed declaration.

Nor had Mr. Borden contacted me in response to my voice mail message.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further, that the statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Re: U.S. Patent Application for **METHOD & APPARATUS FOR QUEUE MANAGEMENT**

Your File: BA0447

Our File: 2204/A05

Dear Marty:

We have received our return postcard from the U.S. Patent and Trademark Office (USPTO) relating to the above-referenced patent application. Enclosed for your review is a copy of the return post card and a copy of the patent application as filed. Also enclosed is a combined Declaration and Power of Attorney and an Assignment.

The USPTO date stamp shows that the application was received on May 25, 2000 and was tentatively assigned serial number 09/578,564.

In order to obtain the earliest possible filing date, the patent application was submitted without an executed Declaration and Power of Attorney. The Declaration is essentially a statement by you that (1) you have read the patent application; (2) you understand the contents of the patent application, including the claims; (3) the patent application correctly describes your invention and the best mode known to you for making and using the invention as of the filing date; (4) you believe that you are an actual inventor of the invention as represented by at least one of the claims; and (5) you acknowledge the duty to disclose all information known to you that may be material to patentability as discussed below. The Power of Attorney enables the named attorneys and agents to prosecute the patent application and transact business with the USPTO as needed to prosecute the patent application. We need to file a fully executed Declaration and Power of Attorney for each inventor in order for the PTO to continue processing the patent application. Therefore, please read the patent application, paying particular attention to the

Marty Borden

Page 2

claims. If you are satisfied that you understand the contents of the patent application, the patent application correctly describes your invention and the best mode known to you for making and using the invention, and you believe yourself to be an actual inventor, then please execute the Declaration and Power of Attorney by signing and dating the combined Declaration and Power of Attorney at the space provided. If you have any questions or concerns, then please do not execute the combined Declaration and Power of Attorney, and instead please contact me at the telephone number listed above so we can resolve any issues. Also, please contact me if you believe that someone is incorrectly listed as an inventor or someone has been omitted as an inventor so that we can provide the correct inventorship information to the USPTO.

In addition, we need to record an assignment in the USPTO. The enclosed Assignment conveys your rights in the invention to Nortel Networks Corporation. Please execute the Assignment by signing and dating the Assignment at the space provided. **THERE IS NO NEED TO HAVE THE ASSIGNMENT NOTARIZED.**

I would appreciate receiving the Declaration and Power of Attorney and Assignment before

July 7, 2000

so that we may complete the filing requirements of the USPTO without an additional expense for an extension of time. Once we have received the signed documents from you, we will file them with the USPTO, and assuming that no problems are encountered, we can expect to receive a formal filing receipt in due course.

We remind you at this time that an applicant is under a strict duty of candor and good faith. As part of this duty, an applicant is obliged to disclose to the USPTO any and all information of which the applicant is aware that is material to the examination of the application. Such information is considered material where "there is a substantial likelihood that a reasonable examiner would consider it important in deciding whether to allow the application to issue as a patent." 37 C.F.R. §1.56(a).

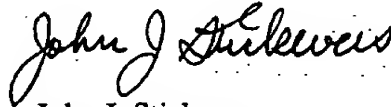

One means for complying with this duty of disclosure is the so called "Information Disclosure Statement." An information disclosure statement is a listing of patents, publications, or other information, together with an explanation of the relevance of each listed item, together with copies and translations of listed items, as appropriate. Ideally, an information disclosure statement should be filed with the application. However, an information disclosure statement can also be filed within the later of three months after the filing date of the application or before the first office action is issued. Of course, if the applicant becomes aware of any relevant art at any point during the prosecution, it is appropriate to file an information disclosure statement at that time as well.

Marty Borden
June 15, 2000
Page 3

Therefore, if you are aware of any relevant art, including relevant articles, patents, or other publications (or events such as offering for sale or public use of a product embodying the invention more than one year before the effective filing date of the application), please send us copies of these documents (or information concerning these events) at your earliest convenience so that we may comply with the duty of disclosure. For example, you may have uncovered such documents while researching the subject matter to be patented, or conducting novelty or clearance searches. Also, such documents often turn up during the course of prosecution of a related case in a foreign jurisdiction. If there is any question as to whether or not a particular document or event is relevant, it is advisable to disclose that document or event to the USPTO in order to avoid any possible allegation of fraudulent or inequitable conduct, and to strengthen any patent ultimately issuing on the application.

Thank you for your attention to this matter. Please feel free to call me if you have any questions or comments.

Very truly yours,

A handwritten signature in cursive script, reading "John J. Stickevers".

STATE OF INCORPORATION OF ASSIGNEE: N/A

INVENTION: Method and Apparatus for Queue Management

ATTORNEY DOCKET: 2204/A05

SERIAL NO: 09/578,564

FILED: May 25, 2000

Assignor is the sole inventor (if only one inventor is listed above) or a joint inventor (if more than one inventor is listed above) of the above invention (the "Invention") described in a United States patent application (the "Application") bearing the above attorney docket number and having as a title the above name for the Invention. The Application has a Patent and Trademark Office filing date and serial number as indicated above, or if no filing date and serial number are shown, has a Declaration executed by Assignor contemporaneously with this Assignment.

For valuable consideration, receipt of which is acknowledged, each Assignor hereby assigns to Assignee (which term shall include Assignee's successors and assigns), all of Assignor's right, title and interest in the Invention, all improvements therein, the Application and

all priority rights arising therefrom, and any patents, and any reissues and extensions thereof, which issue in any country upon any patent applications which correspond with any of the following: the Application, any divisional, continuation-in-whole, or substitute United States application which is based on the Application; or any continuation-in-part United States application (including divisions, continuations-in-whole or -in-part, and substitutions thereof or therefor) based in-part on any of the above described applications.

Each Assignor further agrees that such Assignor and Assignor's heirs and legal representatives will, without further consideration, cooperate with Assignee in the prosecution of all of the above applications, execute, verify, acknowledge and deliver all such further papers, including applications for patents and for reissues and extensions therefor, and instruments of assignment and transfer thereof, and will communicate any facts known to Assignor relating to the Invention, to obtain or maintain or enforce patents for the Invention and improvements therein in any and all countries and to vest title thereto in Assignee. Each Assignor further agrees that such Assignor will, without further compensation to Assignor during the term of such Assignor's employment by Assignee and thereafter for reasonable compensation as determined by Assignee, perform such other acts as may be reasonably required when requested by Assignee, including attending depositions, preparing and executing declarations and affidavits and testifying as a witness, to obtain or maintain or enforce patents for the Invention and improvements therein in any and all countries and to vest title thereto in Assignee.

IN WITNESS WHEREOF, each Assignor hereby executes this instrument on the date set forth below.

We have received our return postcard from the U.S. Patent and Trademark Office (USPTO) relating to the above-referenced patent application. Enclosed for your review is a copy of the return post card and a copy of the patent application as filed. Also enclosed is a combined Declaration and Power of Attorney and an Assignment.

The USPTO date stamp shows that the application was received on May 25, 2000 and was tentatively assigned serial number 09/578,564.

In order to obtain the earliest possible filing date, the patent application was submitted without an executed Declaration and Power of Attorney. The Declaration is essentially a statement by you that (1) you have read the patent application; (2) you understand the contents of the patent application, including the claims; (3) the patent application correctly describes your invention and the best mode known to you for making and using the invention as of the filing date; (4) you believe that you are an actual inventor of the invention as represented by at least one of the claims; and (5) you acknowledge the duty to disclose all information known to you that may be material to patentability as discussed below. The Power of Attorney enables the named attorneys and agents to prosecute the patent application and transact business with the USPTO as needed to prosecute the patent application. We need to file a fully executed Declaration and Power of Attorney for each inventor in order for the PTO to continue processing the patent application. Therefore, please read the patent application, paying particular attention to the

claims. If you are satisfied that you understand the contents of the patent application, the patent application correctly describes your invention and the best mode known to you for making and using the invention, and you believe yourself to be an actual inventor, then please execute the Declaration and Power of Attorney by signing and dating the combined Declaration and Power of Attorney at the space provided. If you have any questions or concerns, then please do not execute the combined Declaration and Power of Attorney, and instead please contact me at the telephone number listed above so we can resolve any issues. Also, please contact me if you believe that someone is incorrectly listed as an inventor or someone has been omitted as an inventor so that we can provide the correct inventorship information to the USPTO.

In addition, we need to record an assignment in the USPTO. The enclosed Assignment conveys your rights in the invention to Nortel Networks Corporation. Please execute the Assignment by signing and dating the Assignment at the space provided. **THERE IS NO NEED TO HAVE THE ASSIGNMENT NOTARIZED.**

I would appreciate receiving the Declaration and Power of Attorney and Assignment before

so that we may complete the filing requirements of the USPTO without an additional expense for an extension of time. Once we have received the signed documents from you, we will file them with the USPTO, and assuming that no problems are encountered, we can expect to receive a formal filing receipt in due course.

We remind you at this time that an applicant is under a strict duty of candor and good faith. As part of this duty, an applicant is obliged to disclose to the USPTO any and all information of which the applicant is aware that is material to the examination of the application. Such information is considered material where "there is a substantial likelihood that a reasonable examiner would consider it important in deciding whether to allow the application to issue as a patent." 37 C.F.R. §1.56(a).

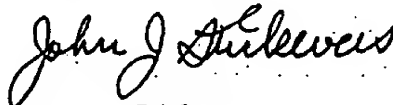

One means for complying with this duty of disclosure is the so called "Information Disclosure Statement." An information disclosure statement is a listing of patents, publications, or other information, together with an explanation of the relevance of each listed item, together with copies and translations of listed items, as appropriate. Ideally, an information disclosure statement should be filed with the application. However, an information disclosure statement can also be filed within the later of three months after the filing date of the application or before the first office action is issued. Of course, if the applicant becomes aware of any relevant art at any point during the prosecution, it is appropriate to file an information disclosure statement at that time as well.

Therefore, if you are aware of any relevant art, including relevant articles, patents, or other publications (or events such as offering for sale or public use of a product embodying the invention more than one year before the effective filing date of the application), please send us copies of these documents (or information concerning these events) at your earliest convenience so that we may comply with the duty of disclosure. For example, you may have uncovered such documents while researching the subject matter to be patented, or conducting novelty or clearance searches. Also, such documents often turn up during the course of prosecution of a related case in a foreign jurisdiction. If there is any question as to whether or not a particular document or event is relevant, it is advisable to disclose that document or event to the USPTO in order to avoid any possible allegation of fraudulent or inequitable conduct, and to strengthen any patent ultimately issuing on the application.

Thank you for your attention to this matter. Please feel free to call me if you have any questions or comments.

Very truly yours,

John J. Stickevers

ASSIGNMENT

ASSIGNOR: Victor Firoiu
Marty Borden

ASSIGNEE: Nortel Networks Limited
World Trade Center of Montreal
380 St. Antoine Street West, 8th Floor
Montreal, Quebec H2Y 3Y4
Canada

STATE OF INCORPORATION OF ASSIGNEE: N/A

INVENTION: Method and Apparatus for Queue Management

ATTORNEY DOCKET: 2204/A05

SERIAL NO: 09/578,564

FILED: May 25, 2000

Assignor is the sole inventor (if only one inventor is listed above) or a joint inventor (if more than one inventor is listed above) of the above invention (the "Invention") described in a United States patent application (the "Application") bearing the above attorney docket number and having as a title the above name for the Invention. The Application has a Patent and Trademark Office filing date and serial number as indicated above, or if no filing date and serial number are shown, has a Declaration executed by Assignor contemporaneously with this Assignment.

For valuable consideration, receipt of which is acknowledged, each Assignor hereby assigns to Assignee (which term shall include Assignee's successors and assigns), all of Assignor's right, title and interest in the Invention, all improvements therein, the Application and

all priority rights arising therefrom, and any patents, and any reissues and extensions thereof, which issue in any country upon any patent applications which correspond with any of the following: the Application, any divisional, continuation-in-whole, or substitute United States application which is based on the Application; or any continuation-in-part United States application (including divisions, continuations-in-whole or -in-part, and substitutions thereof or therefor) based in-part on any of the above described applications.

Each Assignor further agrees that such Assignor and Assignor's heirs and legal representatives will, without further consideration, cooperate with Assignee in the prosecution of all of the above applications, execute, verify, acknowledge and deliver all such further papers, including applications for patents and for reissues and extensions therefor, and instruments of assignment and transfer thereof, and will communicate any facts known to Assignor relating to the Invention, to obtain or maintain or enforce patents for the Invention and improvements therein in any and all countries and to vest title thereto in Assignee. Each Assignor further agrees that such Assignor will, without further compensation to Assignor during the term of such Assignor's employment by Assignee and thereafter for reasonable compensation as determined by Assignee, perform such other acts as may be reasonably required when requested by Assignee, including attending depositions, preparing and executing declarations and affidavits and testifying as a witness, to obtain or maintain or enforce patents for the Invention and improvements therein in any and all countries and to vest title thereto in Assignee.

IN WITNESS WHEREOF, each Assignor hereby executes this instrument on the date set forth below.

Marty,

You were named as an inventor on a patent application that was prepared by our law firm. We sent two documents that require your signature to your home address, specifically a combined declaration and power of attorney and an assignment. To date, we have not received the executed documents from you. We recently sent you a reminder. Would you please contact me at (617) 443-9292 so we can discuss this matter further. I prefer not to send any information that would identify the patent application by email.

Thank you.

Jeff
